

All your vendors in one central and secure place

For many, vendor management means a combination of Excel spreadsheets, shared drives, Word documents, email inboxes, file cabinets or some other homegrown solution.

VendorRisk is web-based software that cleans the clutter and provides effective tracking, monitoring, managing and contract administration of all external service providers.

All the features you need...

- Import from Excel
- Automated email reminders
- Report Wizard
- Customizable user rights
- Unlimited storage / users
- Mobile & tablet-friendly
- Flexible à la carte pricing
- 99.9% monthly uptime guarantee

With VendorRisk, you're able to...

Store all your vendor-related information

Company-wide access to your entire vendor list. Add contacts, upload documents and track insurance policies & third party documentation.

Perform vendor risk assessments

Risk-rate your vendors to determine vendor criticality. Automatically determine your vendor review schedule based on risk level.

Complete vendor performance reviews

Periodically assess & grade vendor performance by answering a set of customizable questions. Spot trends before they become problems.

Manage the vendor selection process

Streamline the vendor selection task by consolidating all project info in one place. Send & receive RFP requests directly in VendorRisk.

Manage contract expirations & renewals

Quickly see when all your contracts are terminating. Upload contract documents. Receive email reminders of upcoming expirations.

Conduct vendor due diligence reviews

Use our customizable diligence review templates to capture all the information & documentation required by each vendor.

Track vendor incidents

Document vendor-related issues & incidents as they happen. Track resolutions & be better prepared during vendor & contract reviews.

Manage your services & IT assets

Track the services & IT assets (software and hardware) that your vendors provide. Use as an inventory management tool.
